**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to an inkjet printing apparatus having a main tank, sub-tank, ink supply means and ink draining means wherein ink draining is performed in advance of ink supply, classified in class 347, subclass 89.
- II. Claims 15-21, drawn to an inkjet printing apparatus having a plurality of main tanks and a plurality of sub-tanks, calculating means and first draining control means for controlling draining so that remaining ink amounts in the plurality of sub-tanks are substantially equal with each other, classified in class 347, subclass 7.

Inventions I and II are related as subcombination and combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the ink draining may occur after the ink supply in the combination whereas this possibility is excluded from the subcombination. The subcombination has separate utility such as for a single color type inkjet printer which does not employ plural main tanks and sub-tanks.

Art Unit: 2853

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Frank DeLucia (Reg. No. 42,476) on October 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
